OBJECTIVE

Cloud-native Full Stack Developer. Always striving to use the best and latest tools for the job. I am looking for long-term permanent or contract positions, remote or on site.

PROFESSIONAL EXPERIENCE

PETLABCO | BACKEND & PLATFORM ENGINEER

Jan 2025 - Present | London (Remote)

- Worked on serverless based web stacks (AWS Lambda, API Gateway, MySQL)
- Built full-stack applications with latest TypeScript libraries for front-end.
- Designed APIs (FastAPI, API Gateway) and managed DB with pydantic, alembic.
- Used design patterns and domain-driven-design.

TECH CONSULTANCY | FULL STACK ENGINEER

Apr 2022 - Dec 2024 | Remote / Cambridge

- Designed and deployed cloud-native AI-driven systems, working with organisations including EDF Energy, Centrica (British Gas), and Novo Nordisk.
- Delivered full-stack systems using Python (FastAPI, Flask), React, and Postgres.
- Designed serverless apps using AWS Lambda + API Gateway.
- Built medical imaging tools and AI chat interfaces in production.
- Created CI/CD pipelines and infrastructure using Terraform, AWS CodePipeline.

BANK OF AMERICA | SOFTWARE ENGINEER III (AVP) - COMMODITIES

May 2022 - Jul 2022 | London, United Kingdom

- Maintained risk platform (Brisk, part of Quartz/Athena) for PnL explain tools.
- Refactored Python-based models backed by Oracle (Sandra).
- Paired with front-office users for iterative SDLC improvements.

UK GOVERNMENT: DEPARTMENT OF HEALTH & SC | DATA SCIENTIST

Aug 2021 - March 2022 | Royal Leamington Spa, United Kingdom

- Developed a Python-based informatics system for a new detection assay.
- Built secure dashboards and managed public health data pipelines.
- Advocated for scalable, transparent AI use in gov tech.

OTHER PROJECTS

SMARTERGOVS.ORG | EDITOR

- Exploring AI in governance, discussing public sector AI adoption, efficiency, and transparency.
- Engaging with policymakers, researchers, and technologists to promote smarter government technology.

SKILLS

CODING

Currently using:

- Python • React/TypeScript
- Next.js • SQL • Tailwind CSS
- NestJS • Vite • Prisma

Python Libraries:

- FastAPI • Pandas • Scikitlearn • Django • PyTest

Previously used:

- C++ • Java • C# • Typescript

PLATFORMS

- AWS • Linux • Azure
- Docker/Kubernetes • NoSQL
- Neo4J • Terraform/IaC
- AWS Lambda • API Gateway
- Serverless Framework

EDUCATION

UNIVERSITY OF LIVERPOOL & UNIVERSITY OF LEEDS

MSc (HONS) COMPUTER SCIENCE

BSc (HONS)

Masters with First Class (Distinction)

2016-21

ACADEMIC

MASTERS PROJECT

AI CLASSIFICATION OF MUSIC GENRE

- Built a Neural Network model classifying music genres using Mel-Frequency Cepstral Coefficients (MFCCs).

INTERESTS

- Artificial Intelligence & NLP
- Tech Policy & Governance
- Cross-Sector AI Adoption
- Journalism & Public Communications
